FUNCTIONAL EXPERTISE DEMONSTRATED

WYSIDIO

September 2016-Present

Front-End Web Developer (Contract)

A software as a service company that provides technology-based solutions to music industry professionals.

- Designed a mobile responsive front-end and a smooth UX using Bootstrap 3.0 and CSS
- Application data flows, rendering, and data stores architected using React and Flux frameworks
- Utilized Soundcloud API to retrieve relevant data about users and tracks

AUSTIN TREE FARM

October 2016-November 2016

Web Developer (Freelance)

Austin's best wholesale tree farm since 1972. www.austintreefarm.com

- Redesigned the website's UI using HTML 5, CSS, and Bootstrap 3.0 to give it a more modern and sleek UI
- Advanced the UX by engineering the site to be browser responsive and mobile friendly
- Improved Search Engine Optimization by adding updated Metadata tags and more descriptive title tags

CODECRAFT SCHOOL OF TECHNOLOGY

June 2016 - September 2016

Student

A 10-week intensive career-focused bootcamp devoted to the MEAN Stack, Javascript, HTML, and CSS technologies.

- Developed full-stack and front-end development projects on both a team and as an individual
- Learned Angular 2 in only 2 weeks to develop Eventbud, an event creation and aggregation site
- Participated in a Hackathon to create an educationally driven site called Codebase, that allows students to share code and knowledge. Designed and engineered the front page to allow for user posts to be populated and answered in real time using Javascript and Node.js
- Worked alongside peers to submit code under deadlines

OTHER EXPERIENCE

ACTIVATE ENTERTAINMENT
Founder/CEO

December 2015 - Present

CABLE GUYS CONSULTING
Field Engineer

July 2015 - June 2016

RELEVANT PROJECTS

Eventbud: Full Stack Developer, an event creation and aggregation website, using Angular 2, MongoDB, Node.js, Express.js, and Javascript. Allowed for event creation, aggregation, and editing all in real time. Events and users are tracked through associations in the Mongo database (2016).

CodeBase: Front End Developer, a site inspired by Stackoverflow and Reddit, where CodeCraft students can share knowledge and code. Engineered the front page of the site to allow users to make posts and respond to posts in real time (2016).

Pong: Front End Developer, Recreated the classic 1972 arcade game Pong using Javascript, HTML, and CSS (2016).

EDUCATION
